

Technical specifications

| | SIZE 1 | SIZE 2 | SIZE 3 |
|---|------------------------------|-----------------------------|-------------------------------|
| USER SIZE AND WEIGHT | | | |
| User's height (floor to axilla) | 50.8cm-81.3cm (20"-32") | 68.6cm-104.1cm (27"-41") | 86.4cm-127cm (34"-48") |
| User's weight | 45kg (100lb) | 72kg (160lb) | 72kg (160lb) |
| Measurement from floor to knees | 10.1cm-30.5cm (4"-12") | 10.1cm-40.6cm (4"-16") | 10.1cm-50.8cm (4"-20") |
| Measurement from floor to hips | 38.1cm-63.5cm (15"-25") | 49.5cm-78.7cm (19,5"-31") | 64.81,3cm-96.5cm (25,5"-38") |
| CHEST | | | |
| Maximum chest circumference | 73.7cm (29") | 83.8cm (33") | 101.6cm (40") |
| Chest width | 12.7cm-22.9cm (5"-9") | 17.8cm-27.9cm (7"-11") | 22.9cm-33cm (9"-13") |
| Chest stop height | 10.1cm (4") | 10.1cm (4") | 12.7cm (5") |
| HIP | | | |
| Maximum hip circumference | 73.7cm (29") | 83.8cm (33") | 101.6cm (40") |
| Hip width | 12.7cm-22.9cm (5"-9") | 17.8cm-27.9cm (7"-11") | 22.9cm-33cm (9"-13") |
| Hip stop height | 10.1cm (4") | 10.1cm (4") | 12.7cm (5") |
| BASE | | | |
| Base width | 50.8cm (20") | 61cm (24") | 61cm (24") |
| Base length | 76.2cm (30") | 91.4cm (36") | 91.4cm (36") |
| TABLE | | | |
| Inner table width | 50.8cm (20") | 61cm (24") | 61cm (24") |
| Inner table length | 40.6cm (16") | 50.8cm (20") | 50.8cm (20") |
| Table tilt angle | 0 to 25 degrees | 0 to 25 degrees | 0 to 25 degrees |
| Measurement from axilla to table | 3.3cm-9.9cm (1,3"-3,9") | 7.6cm-14.2cm (3"-5,6") | 10.9cm-18.3cm (4,3"-7,2") |
| MAXIMUM KNEE CIRCUMFERENCE | | | |
| Knee width | 33cm (13") | 38cm (15") | 43.2cm (17") |
| Knee stop height | 3.8cm-8.9cm (1,5"-3,5") | 6.4cm-10.1cm (2,5"-4") | 7.6cm-14cm (3"-5,5") |
| Knee Support height | 10.1cm (4") | 10.1cm (4") | 10.2cm (4,5") |
| FOOT PLATE | | | |
| Foot plate (Width X Length) | 35.6cm x 30.5cm (14" x 12") | 45.7cm x 35.6cm (18" x 14") | 45.7cm x 35.6cm (18" x 14") |
| Foot plate support (Width X Length) | 8.9cm x 19.1cm (3,5" x 7,5") | 10.1cm x 22.9cm (4" x 9,5") | 12.1cm x 30.5cm (4,75" x 12") |
| OTHER | | | |
| Frame tilt | 0 to 24 degrees | 0 to 26 degrees | 0 to 19 degrees |
| Measurement from floor to foot plate | 10.1cm (4,5") | 7.6cm (3") | 7.6cm (3") |
| Unit weight with table | 17kg (38lb) | 22kg (48lb) | 24kg (53lb) |
| Overall width | 50.8cm (20") | 61cm (24") | 61cm (24") |
| Overall length | 76.2cm (30") | 91.4cm (36") | 91.4cm (36") |
| User height (from floor to top of head) | 71.1cm-119.4cm (28"-47") | 94cm-150cm (37"-59") | 121.9cm-182.9cm (48"-72") |

Standing Prone Frame **SKY** -Synetik

Introducing **SKY**, the standing frame designed and tested with families and clinicians throughout Canada to make prone standing as easy and user-friendly as possible. With three guiding principles in mind - adjustability, Canadian manufacturing, and smooth user experience - SKY is the perfect solution for children with reduced mobility.

SKY is available in three sizes and has several features that make it stand out from the crowd.

Its lightweight, safe, and comfortable design ensures that users have the best possible experience, with thoracic, pelvic, and knee stops that adjust to their body with minimal effort. And with quick-release straps, they are held securely in place.

Designed and manufactured in Canada

SKY has an out-of-the-box solution that can adjust to the largest possible range of users. It is also easy to adjust and maintain throughout its life, from assessment to unboxing, initial adjustments, everyday use, stander growth, and yearly maintenance.

The streamlined design

provides freedom of arm and hand movement for activities, while the low footplate facilitates user transfers. And with its easy-to-remove footplate and fabric covers, SKY is effortless to clean.

SKY is highly adjustable

with independent knee stops that can be positioned at different heights and are adjustable in width and depth. The pelvic stop offers independent adjustment of the straps on each side and can be adjusted in width and depth, while the footplate adjusts in height, forward and backward, and tilts in a single step. All of these adjustments can be made without tools, making SKY the perfect solution for those who need a standing frame that is highly adjustable and easy to use.

Choose **SKY**, the standing frame that combines adjustability, Canadian manufacturing, and a smooth user experience into one exceptional product.

The Pelvic Stop

The pelvic stop is composed of a double belt, with one providing support to the buttocks. The pelvic stop offers independent adjustment of the straps on each side and can be adjusted in width and depth.

The Knee Stop

Independent knee stops can be positioned at different heights and are adjustable in width and depth.

The Simple Tray

The tray adjusts in height, forward and backward, and tilts in a single step.

Use at the table

SKY equipment is designed to allow use at a table, with or without a tray.
